Deutsche Börse Index Products

Benchmarks and Underlyings for International Financial Products

Deutsche Börse develops, calculates and disseminates over 3,000 indices under the umbrella brands DAX®, DAXplus® and DAXglobal®, thus making it one of the world's most innovative and renowned index providers. The well known domestic indices DAX®, MDAX® and DivDAX® offer transparency and a clear breakdown for the German market.

The DAXglobal® family, which entails market specific international indices, allows investors to participate, amongst others, in the development of global emerging markets. The DAXplus® strategy indices were developed to offer an attractive risk/return profile compared to the overall market. Above all, this family includes indices based on modern portfolio theory and indices that integrate derivative components, representing

the advancement of traditional indices and covering new investment opportunities.

In addition to pure equity indices, Deutsche Börse also offers indices for bonds, commodities, volatility and longevity risks. Tradable and investible commodity indices are calculated under the umbrella brand CX®. Investors can profit from unexpected market fluctuations with VDAX-NEW® volatility indices. Many of these index products are attractive underlyings for financial instruments: DAX® is the fourth largest underlying for index derivatives in the world; to date well over 200 derivatives have been issued on DivDAX® while the DAXglobal® Russia index is one of the world's most successful underlyings for ETFs.

International Indices

Your gateway to new and interesting equity markets

DAXglobal® indices allow investors to track a range of international markets and themes in a transparent, rule-based and cost effective manner. In particular, these international indices focus on regions with interesting growth rates, such as the emerging markets of Asia or Latin America.

DAXglobal® indices either combine regional indices that track promising economies, e.g. the DAXglobal®-BRIC index provides investors with access to Brazil, India, China and Russia, or track trends or themes of high investor interest, e.g. the DAXglobal® Alternative Energies replicates the performance of companies that focus on alternative renewable energies.

The innovative DAXglobal® Africa Index offers optimal access to the fledgling African market. It encompasses the 35 largest and most liquid companies on the continent.

International indices allow investors to invest indirectly in international markets without having to be registered with the respective national stock exchanges.

We also offer strategy indices, e.g. short indices, portfolio indices or risk trigger indices¹⁾, for international markets.

1) Further details on these concepts can be found in our DAXplus® Strategy brochure

DAXglobal®

Innovative International Indices

DAXglobal® Africa Index

Africa is home to a significant share of the world's natural resources, in particular oil, diamonds, cocoa and gold, and the increasing industrialization of the continent offers sustainable and stable growth potential. The transparent, rule-based index primarily represents the financial and telecommunications sectors, and contains 35 companies from Egypt, Morocco and Nigeria, as well as 15 companies listed in South Africa and in G7 countries.

DAXglobal® Austria Eastern Europe Exposure Index

This transparent and rule-based index offers attractive, tradable access to those companies in Austria that generate a large part of their business in Eastern Europe.

DAXglobal® Austria Mid-Cap Index

A rule-based, transparent and liquid index for the mid-cap segment of the Austrian equity market. It contains the largest companies following the blue chips, mainly from the fields of finance, industry and consumer goods.

DAXglobal® Agribusiness Index

The index tracks the performance of the world's leading agricultural companies from sub-sectors comprising the keeping and processing of farm animals, the production of seed and fertilizer, the food industry and the production and marketing of ethanol and biodiesel.

DAXglobal® Alternative Energy Index

This sector based index concept allows investors, for the very first time, to tap into the high growth momen-

tum in this sector at global level. It contains 15 international companies whose revenue is based on technology and services designed to promote and generate alternative energies such as wind, solar power, biogas, ethanol and geothermal power/hydropower/batteries.

DAXglobal® Asia Index

Asian countries are characterized by dynamic population growth and sustained economic momentum. This index replicates the performance of the 40 largest stocks from the high-growth countries of China, Hong Kong, India, Indonesia, Malaysia, the Philippines, Singapore, South Korea, Thailand and Taiwan.

DAXglobal® Austria Dividend Index

This index comprises the 10 largest companies with the highest dividend yield in Austria.

DAXglobal® BRIC Index

The emerging markets of Brazil, Russia, India, and China (collectively referred to as the BRIC countries) are currently seen as the most important global growth drivers. The index gives investors the opportunity to participate in the performance of these four up-and-coming markets. The composition based on ADRs/GDRs for Brazil, Russia and India, and H shares and red chips for China, increases liquidity and enables efficient market access for all market participants.

DAXglobal® China Index

The index tracks China's 40 largest companies in terms of market capitalization, offering attractive, tradable access to one of the world's largest and most dynamic economies.

DAXglobal®

innovative international indices

DAXglobal® GCC Index

This index provides investors with transparent, rule-based and tradable access to the up-and-coming countries of Bahrain, Kuwait, Oman, Qatar and the United Arab Emirates, which are characterized by very rapid growth and, in particular, by their large oil reserves.

DAXglobal® Latin America Index

This index represents the high-growth markets of Argentina, Brazil, Chile, Columbia, Mexico and Peru in a very balanced manner, and currently comprises 40 top companies from this region. It is composed of ADRs¹⁾ on Latin American companies which are traded on various stock exchanges across the globe.

DAXglobal® Next 11 Index

The index replicates the performance of 40 companies from the six most important countries (Vietnam, Indonesia, South Korea, Turkey, Mexico, and the Philippines) out of eleven emerging markets which are ideally positioned to play a major role in the global economy in the future.

DAXglobal® Nuclear Energy Index

The demand for uranium has increased continuously over the past few years. As a transparent, rule-based index, the DAXglobal® Nuclear Energy Index offers attractive, tradable access to the nuclear energy sector and tracks the performance of the world's leading companies from the following sub-sectors: energy production, nuclear material transport, uranium production, enrichment and storage, and the provision of nuclear power stations and facilities.

DAXglobal® Russia Index

This index tracks the performance of the 30 largest and most liquid ADRs¹⁾ and GDRs²⁾ on Russian companies, which are traded on several stock exchanges worldwide and account for an average daily trading volume of over US\$ 1 million.

DAXglobal® Russia+ Index

Contains 30 Russian ADRs¹⁾, GDRs²⁾ and local shares enabling a broader diversification of listed Russian companies. The index constituents, which are represented by local shares, must be listed on the regional Moscow Interbank Currency Exchange (MICEX).

1) American Depository Receipts (ADRs) are deposit certificates issued by U.S. banks that represent ownership of one, several or only a fraction of a specific stock. ADRs are issued in the US and are traded on stock exchanges worldwide in place of the original share.

2) Global Depository Receipts (GDRs) are deposit certificates that represent ownership of one, several or only a fraction of a specific stock. GDRs are traded on stock exchanges worldwide in place of the original share.

DAXglobal®

Innovative Internationale Indizes

DAXglobal® Sarasin Sustainability Indices

The fact that there is a positive link between sustainable economic management on the one hand, and business success on the other, is now generally acknowledged. The DAXglobal® Sarasin Sustainability indices track companies that meet sustainability criteria for Germany and Switzerland.

DAXglobal® Short Indices

Short indices are inversely linked to the movements of the respective long index, i.e. they track performance versus the previous day with a leverage factor of minus 1. They are calculated for DAXglobal® Asia Short, DAXglobal® BRIC Short, DAXglobal® China Short, DAXglobal® Emerging 11 Short, DAXglobal® Russia Short, DAXglobal® Russia+Short and DAXglobal® India.

DAXglobal® Vietnam Index

The particular design of this index gives investors optimal access to a market, which is still young. It tracks Vietnam's 20 largest companies in terms of market capitalization.

DAXglobal® Water Index

Gives investors efficient, market capitalization-oriented access to companies from the water sector which are traded on international stock exchanges. It includes the key sub-sectors water supply, irrigation and sewage disposal.

DBIX Deutsche Börse India Index®

This index makes the performance of this large, high-growth market tradable for investors. 25 American Depository Receipts (ADRs¹⁾) on Indian companies provide transparent and rule-based investment access to the Indian market.

1) American Depository Receipts (ADRs) are deposit certificates issued by U.S. banks that represent ownership of one, several or only a fraction of a specific stock. ADRs are issued in the US and are traded on stock exchanges worldwide in place of the original share.
