

DAX® FAMILY					
REGIONS	ESG	SIZES	SECTORS	BLUE CHIPS	STYLE & THEME

SCOPE AND OBJECTIVE

The DAX® Index tracks the segment of the largest and most important companies – known as blue chips – on the German equities market. It contains the shares of the 30 largest and most liquid companies admitted to the FWB® Frankfurt Stock Exchange in the Prime Standard segment. The DAX® represents 72% of the aggregated prime standard's market cap. The DAX® is primarily calculated as a performance index. It is one of the few major country indices that also takes dividend yields into account, thus fully reflecting the actual performance of an investment in the index portfolio. The DAX® serves as the basis for the subindices DAX® ex Financials and DAX® ex Financials 30, which excludes all components from the sectors Banks, Financial services, Insurance and Real estate.

KEY ADVANTAGES

REPRESENTATIVE AND DIVERSIFIED

The DAX® is well diversified across sectors such as automotive, chemicals, banking and industrials and covers 72% of the aggregated prime standard's market cap.

Diversification is further enhanced by incorporating a capping factor, which ensures that no component can dominate the index.

EXTREMELY LIQUID INDEX

The DAX® is one of the most traded index derivatives worldwide. In 2018 28.9 million index option contracts and 37 million index future contracts have been traded on Eurex exchange (source: Eurex).

RULES-BASED METHODOLOGY

The DAX® is completely rules-based, and the guidelines are highly transparent to ensure that they are comprehensible to all market participants.

As the data relevant to weighting - such as amount of share capital and number of shares in free-float - is updated on a quarterly basis, investors generally only have to adjust the index portfolio on these dates. This gives them high tradability and cost-efficient index replication.

KEY PERFORMANCE FEATURES

The index shows an attractive level of liquidity combined with a relatively low level of volatility.

INDEX PERFORMANCE

INDEX METHODOLOGY

DAX® is completely rules based and transparent. On the basis of a clear and publicly available set of rules – the Guide to the DAX Equity Indices – the composition of the index is determined in a manner comprehensible to all market participants. In order to qualify for a listing, companies have to have their registered office or operational headquarters in Germany or generate a significant proportion of their trading turnover on the FWB® Frankfurt Stock Exchange and have their headquarters in a member state of the EU or EFTA.

The weighting of a share in the index is determined on the basis of market cap of the shares in free-float. To ensure tradability of the index, the index weighting of an individual share is capped at 10%.

Quick Facts

Weighting scheme	Free-float market cap
Recomposition	Annually

STOXX Ltd. is part of Qontigo

ABOUT STOXX

Qontigo's index provider STOXX Ltd. is part of Deutsche Börse Group and the administrator of the DAX indices under the European Benchmark Regulation.

STOXX Ltd. is an independent, leading index specialist. STOXX Ltd. is providing innovative index solutions for global markets and across all asset classes. The indices are licensed to the world's largest issuers of financial products, capital owners and asset managers as well as to more than 500 companies around the world.

CUSTOMISATION

The index can be used as basis for the definition of customised indices, which can be tailored to specific client or mandate needs. STOXX Ltd. offers customisation in almost unlimited forms for example in terms of component selection, weighting schemes and personalised calculation methodologies.

DISCLAIMER

DAX® and DAXglobal® are registered trademarks. The use of the DAX or DAXglobal indices and other indices, calculated by STOXX Ltd., as well as the use of the respective index data for financial products or for other purposes requires a special license. STOXX Ltd. does not make any warranties or representations, express or implied, with respect to the timeliness, sequence,

accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data. STOXX Ltd. is not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX Ltd. on the merits of that company. Financial instruments based on DAX indices are in no way sponsored, endorsed, sold, or promoted by STOXX Ltd.

BACKTESTED PERFORMANCE ASSESSMENT

This document contains index performance data based on back testing, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.
