DAX® 50 ESG INDEX

DAX® FAMILY					
REGIONS	ESG	SIZES	SECTORS	BLUE CHIPS	STYLE & THEME

SCOPE AND OBJECTIVE

DAX® 50 ESG tracks the performance of the 50 largest German companies listed on the Regulated Market of Frankfurter Wertpapierbörse (FWB®, the Frankfurt Stock Exchange), that have good ESG (Environmental, Social and Governance) scores. Only companies in the HDAX® are eligible for inclusion in the DAX 50 ESG. Companies must pass standardized ESG filters related to Sustainalytics Global Standards Screening, involvement in controversial weapons, military contracting, nuclear power, thermal coal and tobacco production.

KEY FACTS

- The index consists of 50 large ESG screened German stocks listed on FWB Frankfurt Stock Exchange
- The sustainability screens applied are based on responsible policies and aim to reduce reputational and idiosyncratic risks
- Screening is provided by award winning ESG data provider Sustainalytics
- The index benefits from a transparent free float market cap weighting scheme, similar to the parent index
- The index is suitable as underlying for mandates, passive funds, ETFs, structured products and listed derivatives (e.g. DAX 50 ESG index futures and options are traded on Eurex)

INDEX METHODOLOGY

The universe for the DAX 50 ESG is defined by all stocks included in the HDAX Index, which comprises the joint set of companies included in DAX, MDAX® and TecDAX®.

Companies identified as non-compliant based on Sustainalytics Global Standards Screening assessment, which are involved in controversial weapons, military contracting, tobacco production, nuclear power or thermal coal are not eligible for selection (certain thresholds apply).

The selection of companies in the DAX 50 ESG is based on the quantitative criteria of free float market capitalization and ESG Score. The index weighting of an individual share is capped at 7%.
