

MDAX[®] ESG SCREENED INDEX

DAX [®] FAMILY					
REGIONS	ESG	SIZES	SECTORS	BLUE CHIPS	STYLE & THEME

INDEX DESCRIPTION

The objective of the MDAX ESG Screened index is to reflect the performance of the MDAX index, while using ESG exclusion filters to remove companies that fail to meet norms-based screening, controversial weapons screening, minimum ESG ratings and a series of business activity screenings. Removed companies are not replaced, therefore the MDAX ESG Screened index will typically have fewer holdings than the parent MDAX index. The parent MDAX index focuses on midcap companies by tracking the performance of the 50 stocks which follow DAX companies in terms of size or that are not eligible for DAX inclusion.

KEY FACTS

- The index consists of securities from the MDAX index screened for ESG criteria.
- Screening is provided by award winning ESG data provider ISS ESG.
- The index applies a transparent free-float market capitalization weighting scheme, similar to the parent index.
- Diversification is achieved by incorporating a capping factor of 10% at component level, which ensures that no component can dominate the index.

INDEX METHODOLOGY

The MDAX ESG Screened index composition is derived from its parent index, the MDAX index.

STOXX will exclude companies that ISS ESG considers to be non-compliant based on UN Global Compact principles, are involved in controversial weapons, are tobacco producers or distributors and that either derive revenues from thermal coal mining, oil sands, civilian firearms, military equipment, or, have power generation capacity that utilizes nuclear power or thermal coal.

The index weighting is based on the free-float market capitalization, whereby the maximum weighting per share is capped at 10 percent.

Removed companies are not replaced.

ABOUT STOXX

Qontigo's index provider STOXX Ltd. is part of Deutsche Börse Group and the administrator of the DAX indices under the European Benchmark Regulation.

STOXX Ltd. is an independent, leading index specialist. STOXX Ltd. is providing innovative index solutions for global markets and across all asset classes. The indices are licensed to the world's largest issuers of financial products, capital owners and asset managers as well as to more than 500 companies around the world.

CUSTOMISATION

The index can be used as basis for the definition of customised indices, which can be tailored to specific client or mandate needs. STOXX Ltd. offers customisation in almost unlimited forms for example in terms of component selection, weighting schemes and personalised calculation methodologies.

DISCLAIMER

DAX[®] and DAXglobal[®] are registered trademarks. The use of the DAX or DAXglobal indices and other indices, calculated by STOXX Ltd., as well as the use of the respective index data for financial products or for other purposes requires a special license. STOXX Ltd. does not make any warranties or representations, express or implied, with respect to the timeliness, sequence,

accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data. STOXX Ltd. is not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX Ltd. on the merits of that company. Financial instruments based on DAX indices are in no way sponsored, endorsed, sold, or promoted by STOXX Ltd.

BACKTESTED PERFORMANCE ASSESSMENT

This document contains index performance data based on back testing, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.
