Communication concerning DAXglobal BRIC and Russian securities constituents

Dear Sir and Madam,

STOXX Ltd., the operator of Qontigo's index business and a global provider of innovative and tradable index concepts, today announces its decision concerning sanctions against Russia announced by European Union, United Kingdom and United States between February 22nd, 2022 and March 2nd, 2022.

STOXX Ltd., has taken into consideration the extreme or exceptional market conditions affecting Russian securities constituents of DAX Global Indices which includes restriction on capital flows and market disruption that materially negatively influences the aggregated liquidity, capitalization, or tradability of Russia securities, as well as the impossibility for Institutional Investors to physically replicate the performance of an index.

According to the Index rules of DAXglobal BRIC 10 companies from each country Brazil, Russia, India and China are contained in the index. Due to the mentioned exceptional market conditions, STOXX Ltd., has decided, in line with section 6 Limitations of the Guide to the DAXglobal Indices that the DAXglobal BRIC index composition will be modified as follows:

- All 10 Russian current components will be deleted from the index, **at close of Friday March 18th, 2022 in local currency of 0.0000001.**
- Until further announcement, the index will subsequently contain only securities from 3 countries: Brazil, India and China.
